

Message:

Are you thinking of returning to part-time study in September?

Up-skilling is a critical factor in order to stand out in an extremely competitive jobs market and there are lots of ways ITT Dublin's Lifelong Learning team can help you bring your learning aspirations to life.

We offer a whole range of courses in business, science and engineering. These courses are flexible, enabling you to balance family life, work and study. If you are unsure what to study, we also have preparatory courses to give you a flavour of all the different subjects, so that you can decide which ones you really like before committing yourself.

We're also an educational partner on the Government's Labour Market Activation Programme and other back-to-education schemes. The programme enables the unemployed to get back into education by subsidising their tuition fees on selected courses.

For any students on our mailing list - congrats on negotiating your way through another year at the college - we look forward to seeing you next year. And if you have finished for good, we wish you the best of luck with all your future endeavours.

Take care
